

JULY 2023

Engineering the flow of Occupational Health

CALIBRATION SERVICES TO SUIT YOU

We offer a fast and efficient calibration which can be done on-site or in-house (at your premises or ours). You choose which service fits in best with the way you work. Whether you choose to have your equipment calibrated at our premises or yours, we take care of everything for you. Technical support is available by phone for all clients, free of charge.

• • • The on-site service • • •

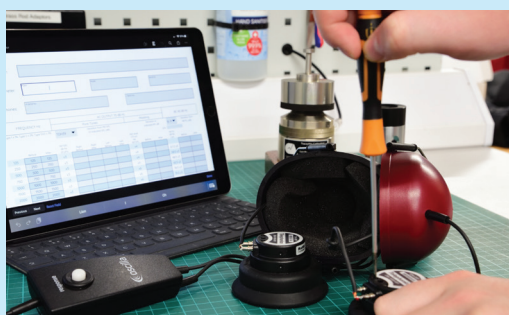

Book a calibration service with P&A Medical Ltd. and you can expect a field service engineer on-site within 5 to 10 working days wherever you are in mainland UK.

• • • The in-house service • • •

Accompanying our on-site service, you can choose to have your occupational health equipment calibrated in-house in our Head Office laboratory.

Simply pack your equipment and send it to us by courier. Items will be calibrated and/or serviced and returned to you within 48-72 hours from receipt.

Call 01204 676180 or email info@pandamed.co.uk to schedule your calibrations today.

INTRODUCING THE

From the makers of Clinell

Instant air purification.

Clean air where and when you need it.

£350
ex VAT

Traps 99.995%
of particles

RediAir uses an advanced composite HEPA 14 and carbon filter to trap incredibly small particles.

High clean air
delivery rate

RediAir has an exceptionally high clean air delivery rate (CADR) of up to 600m³/h. A single unit provides effective ventilation for rooms up to 120m³.

Ultra quiet

RediAir is a powerful air filtration unit with various settings and speeds designed to operate without distraction.
